Spies Hecker – simply closer.

The new Priomat 1K Universal Primer Surfacers 4095 Aerosol stands for high productivity.

The new Priomat 1K Universal Primer Surfacers 4095 Aerosol offers improvements in productivity particularly where smaller repairs are concerned. The repair process is shortened considerably thanks to a reduction in process steps, simple universal application, and rapid-drying performance.

The product is designed to enhance fast working processes and can be used directly on bare metal and the most common plastic substrates during a collision repair.

The innovative Priomat 1K Universal Primer Surfacers 4095 Aerosol helps bodyshops to be more efficient, profitable, and sustainable.

Features:

- Application directly on all metal and common plastic substrates
- Very good corrosion protection
- Promotes shorter process times and reduces the number of products needed per repair leading to reduced material consumption
- Short flash-off and drying times – considerably shorter when compared to existing aerosol primers
- Easy application thanks to SprayMax technology, very good sprayability and flow
- High filling power – easy sanding
- Can be recoated after sanding with both waterborne basecoats as well as solvent-based basecoats and topcoats
- Excellent adhesion and intercoat adhesion
