QUALITY UND DEVELOPMENT 15-16

MOTIP DUPLI ECO-NATURAL TRAIL 17-18

A close-up photograph of several parallel stripes of vibrant, multi-colored spray paint (red, orange, yellow, green, blue, and purple) applied to a dark, textured asphalt surface. The stripes are slightly blurred, suggesting motion or a shallow depth of field.

QUALITY FROM MOTIP DUPLI

The MOTIP DUPLI GROUP, with a turnover of about 170 million Euros and 735 employees across the group, is by far Europe's number 1 producer of spray paints and touch-up pencils. The family-run business, with its long and illustrious tradition, places a great deal of emphasis on the environmentally friendly and safe use of resources. Ongoing investment in environmental protection measures, regular modernisation of our systems and staff training with a resulting qualification all form the basis of the continuous growth of our company's success. Our high quality standards are safeguarded by production processes certified in accordance with quality management standards DIN EN ISO 9001, 14001 and 16001, and guarantee user protection through the application of the most rigorous safety measures. Our superbly organised logistical operation at our Haßmersheim plant means, among other things, that we can deliver your goods within 24 hours throughout Germany, Austria, Switzerland, France and Italy.

Our tradition and the expertise of our staff are the result of more than 55 years of experience in the field of aerosol paints. And it is our intention to uphold this tradition. New product concepts such as the COLORMARK marking concept have been jointly developed with professional users to meet the highest standards. In 2010, the sale across the group was more than 4 million marking spray cans, amounting to an increase of 20% on the previous year. You can have complete confidence in the very highest product quality and innovative technology straight from the producer.

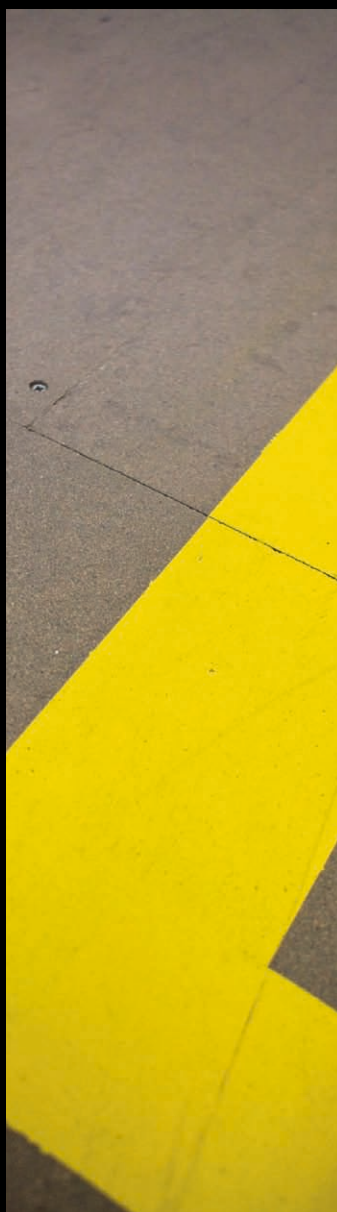

COLORMARK MARKING SPRAYS

Get faster to the right product

The COLORMARK brand has for many years provided a high-quality marking concept for the highest customer requirements and the widest imaginable range of applications. In order to provide faster and safer guidance to the professional user in respect of the individual COLORMARK marking sprays and to deliver clarity at a glance concerning the most important quality characteristics of the different sprays, we used certain “icons” to make our guarantees of performance visible directly on the labels.

Besides this, we also used a new and fresh colour-coding system to make it significantly easier to distinguish between the different marking sprays, such as Spotmarker, Linemarker, Ecomarker and Allroundmarker. The existing colour tones of the respective product lines have likewise been integrated into the label, thereby making it easier to reorder the correct marking colours.

description of the icons:

TOP COVERAGE

Coverage of a can of COLORMARK Allroundmarker, depending on spraying distance and coat thickness

TOP COVERAGE

Coverage of a can of COLORMARK Spotmarker, depending on spraying distance and coat thickness

TOP COVERAGE

Coverage of a can of COLORMARK Ecomarker, depending on spraying distance and coat thickness

SPEEDLINER COMPATIBLE

Coverage of a can of COLORMARK Linemarker in a Speedliner² linemarking cart, depending on spraying distance and coat thickness

SELF-CLEANING

No bleeding of the marking spray necessary after use. 100% empty spray guarantee

EASYTOUCH SYSTEM

User-friendly operation thanks to the one-handed safety cap with lockable spray trigger

360° APPLICATION

COLORMARK Allroundmarker makes it possible to apply markings in all positions and directions

TOP BRIGHTNESS

Intense brightness of the Fluo colours thanks to specially selected and concentrated luminescent pigments

TOP OPACITY

Highest degree of opacity of nonluminescent colours

ECOLOGICAL

Particularly environmentally-friendly chalk-based marking spray with plant-friendly ingredients

LIGHT AND WEATHER RESISTANT

Exceptionally durable and wearproof special marking spray for permanent safety signage

SHARP EDGES

Patented Linemarker valve and spray system guarantees clean, welldefined edges of marked lines with minimal overspray

SPOTMARKER FLUO & NON FLUO

PROFESSIONAL GROUND MARKING

GUARANTEED TO MARK THE GROUND AND NOT YOUR FINGERS

The tried-and-tested COLORMARK Spotmarker returns convincing results in even the most difficult working conditions. The user-friendly one-handed safety cap guarantees dirt-free marking as well as the prevention of unintentional spraying. Thanks to the lockable trigger, the Spotmarker can easily be activated and re-secured singlehandedly without any need to remove the cap. We guarantee that you will be able to empty completely the spray without any residue. The self-cleaning spray system means that the marking spray does not require bleeding after use.

The ideal marking tool for civil engineering and road construction, garden construction and landscaping, surveying, local authorities and industry, not to mention numerous further applications on almost all types of surface.

PROPERTIES

- For the fast, clean and accurate marking of asphalt, concrete, brick, plaster, wood, soil and many other surfaces
- Patented one-handed safety cap with lockable spray trigger safely prevents unintended spraying and "coloured" fingers
- Thanks to the self-cleaning system, complete emptying of the can is guaranteed (no bleeding necessary after use)
- Special tilting valve for accurate wall and floor marking
- Wear-proof and weatherproof marking lasting up to 9 months
- High-quality opacity thanks to a particularly high proportion of pigments
- Special spray system with resulting outstanding yield
- Intense luminescence of the Fluo colours
- Outstanding adhesion to damp surfaces
- Reliable even at minus temperatures (down to -20°C)
- Extremely easy to shake up even after long periods of storage
- Simple to apply even with gloves
- Safety cap removable for use in marking accessory devices
- Environmentally friendly with no risk to health

AVAILABLE IN THE FOLLOWING COLOURS

SPOTMARKER FLUO 500ml

fluo pink | 201479

fluo red | 201486

fluo orange | 201493

fluo yellow | 201509*

fluo green | 201516

fluo blue | 201523

* ideally suited to use on light surfaces thanks to the intensely luminescent pigments

SPOTMARKER NON FLUO 500ml

white | 201554

yellow | 201547*

red | 201530

grey | 201578

black | 201561

* ideally suited to porous, fresh or dark surfaces such as asphalt or tarmac

ALLROUNDMARKER FLUO

The special Allroundmarker marking spray with capillary tube spray head and safety cap is perfect for accurate lettering. The 360° valve makes it possible to spray in all positions and directions. We guarantee that you will be able to empty completely the spray without any residue. The self-cleaning spray system means that the marking spray does not require bleeding after use.

The ideal marking tool for tunnel construction, electricians, local authorities and industry, not to mention the numerous other areas of application on nearly all types of surface.

ECOMARKER CHALK-BASED

The special chalk formulation makes the Ecomarker a particularly environmentally-friendly marking spray. The plant-friendly ingredients do not cause any damage to the marked object. Thanks to the chalk-based composition the marking is also only visible for a few days to weeks and can easily be removed with water; if left, it will quickly fade in heavy rain and in places with high volumes of traffic.

The ideal marking tool for sports fields or golf courses, police marking of accident scenes, fire brigade, army, sporting events, trade fairs, local authorities, garden construction and landscaping.

PROPERTIES

- Chalk-based marking spray
- Plant-friendly ingredients
- Does not cause any damage to the marked object (e.g. lawns)
- For interior and exterior use
- For short-term marking (a few days to weeks)
- Easily removable with water
- Patented one-handed safety cap with lockable trigger safely prevents unintentional spraying and "coloured" fingers
- Special spray system with resulting outstanding yield
- Outstanding adhesion to damp surfaces
- Reliable even at minus temperatures (down to - 20°C)
- High quality opacity
- Safety cap removable for use in marking accessory devices
- Environmentally friendly with no risk to health

AVAILABLE IN THE FOLLOWING COLOURS

ECOMARKER 500ml / 750ml

white | 230790 / 278242*

fluo yellow | 230806 / 278273*

fluo red | 230813 / 278266*

fluo orange | 231209

fluo pink | 231216

* For use in the Speedliner² marking cart

LINEMARKER FOR SHARP LINES

PRECISE – CLEAN – PERMANENT RELIABLE MARKING WITH LINEMARKER

The Linemarker comes into its own when the colour needs to remain visible for as long as possible and a high degree of wear resistance is essential. There are many possible applications, ranging from car parks, garages, warehouses, open spaces and industrial installations to playgrounds and sports pitches.

The highly pigmented special colour stands out due to its high degree of resistance to light and weather, and is available in 500 and 750 ml containers and in all major colours. The Linemarker is also available in grey and black as a correction spray for accidental marking errors. The patented valve and spray system ensures clear, precise and clean marking with minimal overspray. At an average spray width of 10 cm, the 500 ml Linemarker covers approx. 50 m and the 750 ml version approx. 75 m. This means that larger marking projects can also be realised quickly and inexpensively.

PROPERTIES

- High-quality opacity
- Very wear-proof
- Highly resistant to light and weather
- Resistant to petrol and chemicals
- Very dirt repellent
- The patented valve and spray system ensures clear, precise and clean marking with minimal overspray
- Extremely easy to shake up even after long periods of storage
- Quick drying
- Wide range of colours including correction colours
- Environmentally friendly with no risk to health

AVAILABLE IN THE FOLLOWING COLOURS

LINEMARKER 500ml / 750ml

white | 201639 / 201714

yellow | 201646 / 201721

red | 201653 / 201738

orange | 201660 / 201745

green | 201677 / 201752

blue | 201684 / 201769

grey | 201691* / 201776*

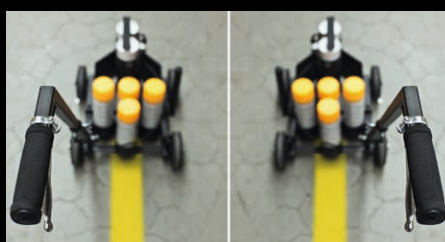

black | 201707* / 201783*

* can also be used as correction spray (concrete/tarmac)

MARKING ACCESSORY DEVICES

KEEPING YOUR LINES STRAIGHT

A high-quality marking cart, the "Speedliner²" is available for clean, fast and inexpensive line marking in exterior and interior settings. The innovative marking cart was specially developed for use with the COLORMARK Linemarker. The line width can be freely set between 4 and 12cm. Depending on the requirements of the marking project, the marking cart even allows for simultaneous spraying with two COLORMARK Linemarker cans. Therefore, an even better wear resistance is possible at a faster working speed. For longer marking areas the Speedliner² can transport up to four additional Linemarkers. For difficult periphery marking operations next to walls or pallet spaces, the marking system can simply be mounted on the outside on both sides.

COLORMARK

SPEEDLINER²

- Specially developed for use with the COLORMARK Linemarker
- Strong construction and very quiet running
- Possible to undertake marking operations with two cans at the same time
- 500ml, 600ml und 750ml cans may be used on the cart
- Easy to assemble
- Foldaway handle for easy and space-saving transportation
- Spray width scale permits easy setting of spray width (4-12 cm)
- Storage option for 4 additional cans
- Handle adaptable for left- and right-handed operators
- Marking systems can be swapped to the outside for peripheral marking purposes

COLORMARK ACCESSORIES

Robust spraying aids are available in different lengths and with different attachments for maintaining comfort during long marking operations

SPEEDMARKER SHORT

ART.-NO. 270161

The marking pistol can be used to carry out labelling work at a range of intervals from 20-50 cm without the onset of fatigue. For use with Linemarker, Spotmarker and Ecomarker in all container sizes.

SPEEDMARKER LONG

ART.-NO. 270178

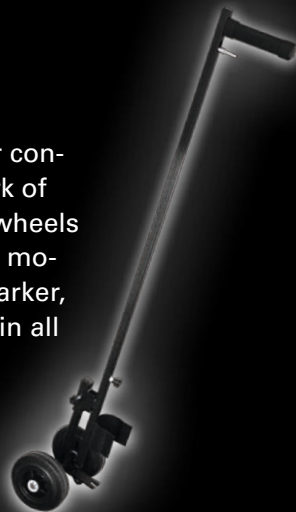

The optimal spraying aid for maintaining comfort during long marking operations without any need to bend over. For use with Linemarker, Spotmarker and Ecomarker in all container sizes.

SPEEDMARKER 2-WHEEL

ART.-NO. 286179

The optimal spraying aid for convenient guided marking work of long duration. Hard rubber wheels ensure easy and safe rolling movement. For use with Linemarker, Spotmarker and Ecomarker in all container sizes.

MARKING CART SPEEDLINER²

ART.-NO. 262760

Suitable tool for exact line marking. The simultaneous spraying with two COLORMARK cans makes it possible to work twice as fast. For use with Linemarker 500 ml and 750 ml and Ecomarker 750 ml.

MARKING CART SPEEDLINER² AIR

ART.-NO. 290459

The marking cart is additionally available as a „Speedliner² air“ with pneumatic tyres. The high-quality pneumatic tyres make the cart run more quietly and are ideal for use on lawns or difficult surface types. For use with Linemarker 500ml and 750ml and Ecomarker 750ml.

QUALITY AND DEVELOPMENT

FOCUS ON CONTINUOUS IMPROVEMENT

A committee of experts from within the MOTIP DUPLI Group has been convened to help in the continuous further development of the COLORMARK marking concept. This circle of experts meets regularly to make decisions on new marking products or range optimisations.

In collaboration with the laboratory team, important product properties such as yield, opacity, luminescence, handling and wear characteristics on a wide range of surfaces are subjected to regular practical application tests on the company's own testing rig. The laboratory team from MOTIP DUPLI uses state-of-the-art testing equipment for salt spray tests, condensate tests and sun tests. In keeping with the motto "Standing still means going backwards", there is a clear focus here on continuous product development. Thus, for example, new ways of looking at things and thought-provoking ideas from our clients are continuously tested for feasibility. Of particular importance to us is the joint further development carried out in close cooperation with the users of our products. For this reason, our clients are involved in the process at a very early stage and receive regular development results for testing purposes.

The products also undergo continuous further development in respect of environmental and health compatibility. In 1975, we already became the first business in Europe to make use of ozonefriendly propellants on a voluntary basis. For the last 28 years our products have contained no toxic heavy metals. Furthermore, all our con-

tainers are completely recycable and therefore permitted to carry the symbol „Grüner Punkt“. At the end of 2007 the DIN EN 14001:2004 integrated environment management system was introduced in our plants in Haßmersheim and Schwerte. The environmentally-friendly production process which we had been using for many years

prior to that date was further optimised in the process, with the result that the demands made of us were not only met but even exceeded.

Certification in line with the most recent energy management guidelines in accordance with DIN EN 16001:2009 was successfully acquired in 2010.

ECO-NATURAL TRAIL

Our sense of responsibility for the environment and our strategic corporate direction for the future are both reflected in the 1-kilometre-long eco-natural trail that winds its way around almost all the production and warehousing facilities on the Haßmersheim site, distributed across several halls. The eco-natural trail is fringed by a total of eleven stations: two wild hedgerows, a wild meadow, a lake biotope, an insect and amphibian castle, a domicile for kestrels, a bat colony, a rainwater collection tank, a wetland biotope, a meadow with fruit trees and even a complex for tawny owls. Our aspiration to active nature and environment conservation, which goes back more than 30 years, has thus found concrete expression for the first time.

Efficient, versatile and environmentally-friendly products are manufactured by us in an environment which has been shown to be ecologically balanced. More than 2,000 animals and 4,000 plants show that the environment and the soil around the company grounds are intact and that our daily activities are carried out in harmony with nature.
