MouseStop®: Animal-friendly pest-control paste

MouseStop is an animal-friendly pest-control and sealing paste used for rodents and other pests. MouseStop has been used by the international pest-control industry since 1990.

MouseStop applications include

- Cracks and joints in wall cladding and brickwork.
- Joints and expansion joints.
- Steel, cast-iron and PVC recesses and ducts.
- Settlement cracks.
- Connections between brickwork and drains.

Advantages of MouseStop

- Contains no pesticides and biocides.
- Instantly waterproof (suitable for indoor & outdoor application).
- Instantly active barrier.
- Sustainable.
- Reliable product since 1990.
- In line with IPM approach.

Industries

Its unique properties allow the pest-control paste to be used on a wide scale in the food industry and is prescribed in specifications.

Furthermore, MouseStop is used in, for instance, kitchens, bakeries, distribution centres, manufacturing companies and companies with hygiene sensitive areas and environmental requirements.

Composition

Blend of vegetable oils, fillers and polystyrene pearls.

Packing

MouseStop is packaged in 300 ml cartridges.

A box contains 12 cartridges of 300 ml each.

Instructions

Preparation

Make sure the surface is dry and clean. Remove loose material.

Application

- 1 Can be used for openings/ducts of at least 5 mm. Apply the MouseStop with a caulking gun. Make sure the layer depth is at least 10 mm.
 - 2 Smooth with a palette knife.
 - 3 The barrier is now active.
- ! Clean hands and tools with a dry cloth after use, if necessary use white spirit.

Please note

- Keep out of reach of children.
- Avoid contact with eyes and mouth.
- Not suitable for consumption.
- Do not apply near sources of heat.
- Can be painted after 48 hours (at 20°C).
- Surface is dry after 48 hours (at 20°C).
- Store in a frost-free place.
- Processing temperature between -50°C / +90°C.
- The required layer depth may vary.
