## The high-performance lubricant preventing brake noises – Bosch Superfit

This permanent lubricant optimally prevents noises that could occur on disc and drum brakes. In addition, Bosch Superfit ensures a long and reliable service life.

### Resilient lubricant for reliable braking performance

High-performance lubricants for brakes are subject to high strains over long periods of time. Bosch Superfit stands out for its powerful composition:

- ▶ Long-term durability thank to low oil separation
- ▶ Lower tendency to collecting dust (pasting) than comparable products on the market
- ▶ Outstanding resistance to heat arising when braking
- ▶ Insensitive to both high and low ambient temperatures

### Just perfect for a professional assembly

- ▶ Metal-free, acid-free and non-conductive – and thus non-corrosive
- ▶ Compatible with all metals and most rubber materials
- ▶ Ideally suited for both steel and aluminum brake calipers as well as for ABS
- ▶ Can also be used for the assembly and protection of compressors, central lubrication units, seat rails, sliding roof guides, door catch straps and battery terminals

### Practical Bosch Superfit brush can

- ▶ For targeted and selective application
- ▶ Particularly quick and providing accurate results
- ▶ Ergonomic handling
- ▶ Eased stock-keeping and transport by practical trading units
- ▶ No hazardous material as defined by the transport regulations

## Advantages for workshops:

### Increased brake comfort thanks to Bosch Superfit:

- ▶ **Problem:** Assembly with lubricants containing copper can lead to resonant vibrations and/or make it more difficult for the brake pads to return smoothly once the brake is released. Both of these can result in noise.
- ▶ **Solution:** Use Bosch Superfit on the guide surfaces and on the rear of the pads.
- ▶ **Advantage:** Noise prevention (e.g. squeaky brakes) and improved sliding properties of the brake pads.

### Protection against corrosion using Bosch Superfit:

- ▶ **Problem:** Environmental influences such as rain, road salt and dirt can cause corrosion.
- ▶ **Solution:** Bosch Superfit helps preventing corrosion due to its excellent resistance to being washed off by water.
- ▶ **Advantage:** Bosch Superfit significantly extends the service life of braking components. Moreover, it is fully compatible with aluminum calipers as it does not contain any copper able to react with aluminum.

### Three versions of Bosch Superfit are now available::

Description	Order number
Sample bag (5 g)	5 000 000 151 (000)
Tube (100 ml)	5 000 000 150 (44N)
<b>New!</b> Brush can (200 ml)	5 000 000 376 (EE9)
